

Zach Cohen

User Experience Researcher & Designer | zach-cohen.com

My background and work experince are focused on how we interact with the world around us. Through design and research, I am mindful of the entire lifecycle of a product and its business impact. My goal is to help create and improve systems for groups working in the life sciences, specifically dealing with genetic or autoimmune diseases.

Experience

Bentley University User Experience Center

Research and Design Associate | 2021 – 2022

- Assisted clients with user research across industries such as medical devices, healthcare, and biotechnology.
- Qualitative and quantitative data analysis, insight synthesis, presentation of findings and recommendations

Integrate Inc.

Product Designer | 2019 – 2021

- Established a design system guild to guide best practices and overall progression.
- Partnered with product management to conduct discovery and define software features.
- Led design and product-informed strategy for several product development teams.
- Prototyped, user tested, and collaborated with engineering to implement and ship designs.
- Developed user research initiatives to improve integration of research into the product development process.

InEight

Interaction Designer (Contract) | 2018 – 2019

- Translated design vision established through research to update legacy product.
- Worked closely with product and development teams to add and refine product features.
- Led user experience optimization alongside key stakeholders and product management.

Nucelus Marketing Lab

User Researcher (Contract) | 2018 – 2018

- Helped recognize user behavior and re-frame product development goals through qualitative and quantitative research and analysis.
- Used accumulated data to help provide brand strategy insight for both regional and national companies.

Education

Bentley University

M.S. – Human Factors in Information Design
Expected Graduation 2022

Designlab

Certificate - User Experience Design
Graduated 2018

Woodbury University

B.A. – Interdisciplinary Studies (Psychology and Interior Architecture Emphases)
Graduated 2017

Skills

Qualitative and Quantitative Research
Usability Testing
High Fidelity Prototyping
User Interface Design
Information Architecture

Software and applications

Design

Figma	HTML
Adobe XD	CSS
Sketch	JavaScript
InVision	GitHub
Framer	Mural

Research

Dovetail	Qualtrics
Pendo	Survey Monkey
FullStory	Miro

Topics of Interest

Healthcare	AI/ML
Personal Health	Data Ethics
